# Barrier, Partition & Cladding Solutions

## Polycarbonate and PVC Product Selection Guide

Sanitary surfacing solutions such as barriers and dividers, safety shields, antimicrobial cladding, sneeze guards, and other protective products are becoming increasingly necessary as state economies begin to reopen...which means versatile plastics are in high demand!

Architects, designers, contractors and facility managers across the country are working on both temporary and permanent solutions to help facilitate social distancing in the post-COVID-19 world. To do this, we need to create environments within businesses and public facilities where it's easy to maintain germ-free contact surfaces and other high-touch areas. We also need to rethink facility interiors and reshape them to allow for safe distancing between people.

The chart below allows you to compare Palram products according to their properties and attributes to select the perfect solution for your end-user's requirements.

Check out our selection guide below or call 800.999.9459 for immediate assistance.

How to Disinfect/Sanitize  
Polycarbonate & PVC:
